Gurugram, Haryana, India

## Professional Summary

Entry-level **AI/ML and Python Developer** with hands-on experience building production-style **Generative AI** and machine learning applications using **Python, FastAPI, LangChain, PostgreSQL, and LLMs**. Skilled in designing **RAG pipelines**, integrating LLM APIs, engineering NLP/ML pipelines with **85%+** feature coverage across 300+ skill categories, and building explainable, data-driven prediction systems. Strong foundation in **Java, OOP, REST API development, and Git-based collaborative workflows**. Seeking an entry-level AI/ML or Software Engineering role to build scalable, production-grade AI systems.

## Key Skills / Key Highlights

**Generative AI & LLMs:** LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Groq API, LLM Integration, Vector Databases, Chat Memory Design

**Machine Learning & NLP:** Scikit-learn, XGBoost, LightGBM, CatBoost, SHAP (Explainable AI), TF-IDF, Cosine Similarity, Feature Engineering

**Backend & APIs:** Python, Java, FastAPI, Spring Boot, REST API Design, OOP, SQLAlchemy

**Databases:** PostgreSQL, MySQL, SQLite

**Tools & Platforms:** Git, GitHub, Google Cloud Platform (GCP), Postman, VS Code, IntelliJ IDEA, Eclipse

## Projects

### HireSense – AI-Powered Resume Analyzer & Hiring Prediction System

*Python, Scikit-learn, XGBoost, LightGBM, CatBoost, NLTK, TF-IDF, SHAP, SQLAlchemy, Streamlit*

- Engineered an end-to-end **ML/NLP resume screening pipeline** processing PDF, DOCX, and TXT resumes, automatically extracting **270+ technical and 58+ soft skills** per candidate
- Built and evaluated **4 ML models** (XGBoost, LightGBM, CatBoost, Scikit-learn) for resume category classification, hiring-probability prediction, and quality scoring, improving screening consistency
- Developed **TF-IDF and cosine-similarity** based job-description matching to automatically rank candidate-job fit, reducing manual shortlisting effort
- Integrated **SHAP explainability** to surface top features driving each hiring prediction, increasing model transparency for recruiters
- Designed an interactive **Streamlit dashboard** with 5 modules (analytics, prediction, skill-gap analysis, model performance, history), backed by **SQLite/SQLAlchemy** for persistent storage

### GenChat – LLM-Powered Conversational Chatbot

*Python, LangChain, Groq API, Streamlit, Prompt Engineering*

- Built a real-time **LLM-powered chatbot** using LangChain and the Groq API, delivering context-aware natural-language responses to user queries
- Designed **reusable prompt templates** through iterative prompt engineering, improving response relevance and conversational consistency
- Implemented **in-session chat memory** using custom Python data structures to maintain multi-turn conversational context
- Architected the application into **modular components** (LLM integration, prompt handling, memory management, UI), improving code maintainability and reusability
- Delivered an interactive **Streamlit UI** enabling real-time input, response streaming, and conversation management

## Education

### World College of Technology and Management

*B.Tech in Artificial Intelligence and Machine Learning – CGPA: 7.8/10*

### Newton High School

*Senior Secondary (PCMB)*

Gurugram, Haryana

*Aug. 2022 – Aug. 2026*

Jhajjar, Haryana

*2021 – 2022*

## Technical Skills

**Languages:** Java, Python, SQL, HTML, CSS

**AI/ML:** Machine Learning, Generative AI, LLMs, RAG, Prompt Engineering, LangChain, NumPy, Pandas

**Frameworks:** FastAPI, Spring Boot

**Databases:** MySQL, PostgreSQL, SQLite

**Developer Tools:** Git, GitHub, Google Cloud Platform, VS Code, Postman, IntelliJ IDEA, Eclipse
